

LED SION SHOEBOX AREA LUMINAIRE

Product Description

LED SION shoebox fixture has a beautiful low profile design for outdoor parking lot or square applications, combines the latest in LED technology 130lm/w brightness, 50000hrs waterproof Ip66 led driver, beautiful light distribution optic lense and versatile brackets for round poles, square pole High-performance illumination with typical energy of 80%, ideal for replacing 100-1000W Metal Halide,

Applications

Parking Lot, Road Ways, Square Parks, Outdoor Lighting Area Lights etc.

SLIP FILTER MOUNT

YOKE MOUNT

ARM MOUNT

Electric Characteristic

LED Chips	Lumileds 3030
CRI	>72Ra
Color Temperature	4000K/5000K/5700K
Input voltage	100-277V 5 YEAR WARRANTY UL Driver
Light distribution type	Type
	12.84%
	<75℃
	0.93

DLC Ordering Model No Information

Projected LED Lumen Maintenance

Operating hours	0	25000	50000
Lumen maintenance factor	1	0.91	0.8

Data references the extrapolated performance projections for the SHOEBOX LED platform in a 25°C ambient, based on 10,000 hours of LED testing (tested per IESNA LM-80-08 and projected per IESNA TM-21-11).

Dimensions

After-sale Service

The product refers to electric knowledge. Please don't disassemble it by yourself. If any quality problem happens, please contact the factory for warranty details.

NOTE: Actual performance may differ as a result of end-user environment and application. All values are without notice.

INSTALLATION MANUAL

Cautions:

1. Can not use the electric generator to test the LED lamp.
2. Please abide by related country, regional and local law and regulations when install this fixture.
3. To avoid electrical shock and damage, please do not install the lights in raining days.

Notices:

1. To prevent from electric shock or fire risk, the installation must be conducted by operator who have professional electrical knowledge.
2. Please wear gloves to avoid injury before installing lamps.
3. During or after installation, if there are situations such as smoke, fire in the wires or lamps, please turn off the power immediately and notify relevant personnel of an overhaul.
4. This light can be used for outdoor installation.

Installation I:

ADJUSTABLE FITTER MOUNTING

1. Loosen the 4 locking bolts on the slip fitter, connect the wire correctly and put the wire into pole. Then fasten the locking bolts between slip fitter and the pole. (figure 1)
2. Loosen the fixing bolts and adjusting bolts, align the fixture to required angle. Tighten adjusting bolt and fixing bolts after the angle is confirmed. (figure 1)

figure 1

Installation II:

YOKE MOUNTING

1. Loosen cap fixing screw and take cap off. Loosen fixing bolt, fixed the fixture on the support and tighten fixing bolts. (figure 2)
2. Let the AC wire go through support hole and connected correctly. Close cap and tighten cap fixing screw after AC cable is well placed in the support. (figure 2)
3. Loosen adjusting screws, align the fixture to required angle and fasten the screws. (figure 2)

figure 2

Installation III: DIRECT MOUNTING

1. Loosen cap fixing screw and take cap off. Loosen fixing bolt, fixed the fixture on the support and tighten fixing bolts. (figure 3)
2. Correctly connecting the wire and fasten cap fixing screw and fixing screw. (figure 3)

Notice: Round pole should be with additional adapter plate. (figure 4)

figure 3

figure 4

Installation IV: FLOOD MOUNTING

1. Use the electric drill to drill holes on the poles or suspended walls . (The hole pitch should be according to the actual application of products, the hole size should be same as the screw the user has). (Figure 5,6)
2. Put the installation bracket on the pole position, and using screws and nuts to fix the light tight, adjust to the desired light angle.
3. According to the local wiring to connect the product to the mains and do a good job of thread protection measures, plug the wire into the poles, cover the pole cover, tighten the side screws.(Figure 7)
