LED Power Supply

Potting of Smidakh
Better for heat dissipation
mothproof, moisture proof

Aluminum shell
Better for heat dissipation

Thermal Dimming
When the temperature reaches 90°C,
lamp power is reduced ,to ensure key
components including the LEDs are
not overheated.

Installation

1. Turn off the Power.
2. Carefully remove the existing Lamp bulb.
3. Disconnecting the input and output leads of the Ballast, and remove the ballast. Please refer to below the schematic diagram.
4. Inset the LED bulb to the E39/E26 base, Adjust the LED module angle and position so that it provides the best lighting.
5. Connecting the input leads of socket to the supply wires carefully.
6. Double check the Input wires of socket, and make sure all connections are correct.
7. Turn on the Power.

Please remove any ballast or capacitor parts before doing the retrofit.
