

LED Cooler Light

V Series

5 Year
Warranty

V Series

Beyond LED Technology is the leader in cutting-edge refrigerated display lighting technology! Our V Series cooler light produces a wider beam for more evenly dispersed lighting. Also, our LED Cooler lights have a built-in driver and a daisy-chain design that allows it to be installed in minutes. Our LED Cooler/Freezer lights qualify for rebate programs with most major power companies. Our V Series Cooler light and Freezer Lamps deliver crisp, bright light that creates attractive food and product displays in freezers and walk-in refrigerator cases. They consume less energy and run longer and cooler than fluorescent freezer bulbs, lowering operating costs and reducing the risk of food spoilage.

- Up to 130 lumens per watt
- V Shape Design
- Wider beam angle
- Universal 100-277Vac 50-60Hz
- Built-in driver
- Daisy-chain (up to 10 lamps in a series).
- ETL Listed
- CRI >80

LED Cooler Light

V Series

Installation

1. Disconnect power from cooler system.

For safety, all power **MUST** be disconnected prior to removal of existing lamps and installation of T8 LED light tubes.

WARNING: Failure to disconnect power could result in serious injury or death. It is the end user's responsibility to consult a licensed electrician and check all local building codes before installation.

2. Remove existing lamps.

Remove lamp covers if present and remove lamps. Your new T8 lights are shatter-proof; you will no longer require lamp covers.

3. Disconnect ballast.

Disconnect wiring from the power source. Ballast removal is optional. Disconnect wiring to original lamp sockets and tie off. None of the existing system will be used, so removal is optional.

Installing with mounting brackets

<FRONT>

Installing with built-in brackets

4. Install brackets.

Use self-tapping screws to mount the brackets. In some cases drilling a pilot hole will make the installation easier. Each mounting bracket can be placed inside of the existing sockets (tombstones).

5. Connect to power source and connect lights in a series.

Connect first cable to the power source. Expose 3 wires to connect. See legend above for connection. Connect the male/female ends of each light. (Not to exceed 10 lights).
